

Fredag den 30. oktober
kl. 13.00-19.10

VIRTUELT MØDE...

**NU SOM VIRTUELT
ET-DAGS MØDE...**

Program til Lungeforum 2020 her til orientering.
Invitationen med information om tilmelding er sendt til ledelsen

Vi glæder os til at ses online!

Styregruppen 2020

Charlotte Suppli Ulrik
Prof., overlæge, dr.med.
Hvidovre Hospital

Elisabeth Bendstrup
Overlæge, ph.d.
Århus Universitetshospital

Finn Vejøl Rasmussen
Overlæge, dr.med.
Nordsjællands Hospital

Nina Skavlan Godtfredsen
Overlæge, klinisk lektor, ph.d.
Hvidovre Hospital

Thomas Ringbæk
Overlæge, klinisk lektor, dr. med.
Hvidovre Hospital

Arrangementet er forhåndsgodkendt af DIMO og berettiger dermed til støtte fra FAPS uddannelsesfond

Vi gør opmærksom på, at Boehringer Ingelheim Danmark A/S har anmeldt arrangementet til ENLI (Etisk Nævn for Lægemiddelindustrien).
Arrangementet er, efter vores opfattelse, i overensstemmelse med reglerne på området, selvom arrangementet ikke på forhånd er godkendt af ENLI.

LIVESTREAMING

Friday 30 October

PROGRAM 2020

13.00 - 13.15	Registration
13.15 - 13.30	Welcome by Boehringer Ingelheim

1. Session: Recent developments in treatment of cough

Chairman: Nina Skavlan Godtfredsen and Charlotte Suppli Ulrik

Cough is the most common respiratory symptom, yet we are far from understanding the full pathophysiological mechanisms behind chronic cough – let alone how to treat this troublesome condition. However new treatments are emerging for especially "cough hypersensitivity syndrome". This session will provide insights into management of chronic cough from diagnostic work-up to current and future treatment modalities.

13.30 - 13.50	Emerging treatments in cough <i>v/Prof Jacky Smith MB ChB PhD FRCP, Manchester Clinical Research Facility</i>
13.50 - 14.10	Guidelines for management of chronic cough <i>v/Professor Alyn Morice, MD FRCP and FBPhS, Hull York Medical School, University of Hull</i>
14.10 - 14.30	Online- discussion
14.30 - 14.45	Casting break

2. Session: Interstitial lung diseases in Connective tissue disorder - the way forward

Chairman: Elisabeth Bendstrup and Finn Vejlø Rasmussen

It is well known that connective tissue diseases such as scleroderma and rheumatoid arthritis can result in lung problems. Infections, drug-induced pneumonitis, bronchiectasis, and COPD are common while interstitial lung disease is rare but often the leading cause of death. Evidence based, approved treatment has been missing but new studies show that antifibrotic drugs can slow down disease progression in these disorders. In this session we will have an update on the newest data of CTD-ILD including new treatment options.

14.45 - 15.05	Interstitial lung disease in scleroderma - what's new? <i>v/Anna-Maria Hoffmann-Vold, MD PhD, Head of SSc research at Oslo University Hospital</i>
15.05 - 15.25	Rheumatoid arthritis – lung manifestations – an update <i>v/Dr Nazia Chaudhuri. Clinical lead of ILD Unit, Manchester</i>
15.25 - 15.45	Online- discussion
15.45 - 16.00	Casting break

3. Session: Obesity and lung disease

Chairman: Thomas Ringbæk and Charlotte Suppli Ulrik

Obesity is associated with an increase in overall morbidity and mortality, but what is the impact of obesity on asthma and COPD? This session will provide and update on lung mechanics in obesity and the clinical implications of obesity in the management of patients with asthma and COPD.

16.00 - 16.20	Obesity and lung function <i>v/Prof. Jann Mortensen, Overlæge, dr. Med, Rigshospitalet</i>
16.20 - 16.40	Obesity and asthma - Underlying mechanisms and clinical implications <i>v/Prof. Dr Zuzana Diamant, pulmonologist, Lund University Hospital, Lund, Sweden; Thomayer University Hospital, Prague, CR</i>
16.40 - 17.00	Online- discussion
17.00 - 17.15	Casting break

4. Session: Palliation, death criteria and ethics

Chairman: Finn Vejlø Rasmussen and Nina Skavlan Godtfredsen

In the first part of this session Dr. Rosalind Ann Taylor will share her views and experiences on holistic approach to living and dying with severe COPD. She will touch upon subjects such as the difficult role of relatives as caregivers. Inappropriate use of medications that are not stopped when focus is changed from probable life sustaining to "end of life" palliation can be a major issue. And perhaps share an idea of a cheap, effective intervention without side effects.

I anden del af sessionen skal vi høre om og diskutere emnet, som har fået en særdeles høj aktualitet i relation til Covid-19 pandemien, men som vi tidligere i hverdagen ikke har forholdt os realistisk til: Tænk at livet koster livet. Sommetider tydeligvis alt for tidligt i et livsforløb. Ofte stent som den uafvendelige konsekvens af at have levet.

Fra Dansk Center for Organdonation skal vi høre om etiske og juridiske problemstillinger i relation til ændringer i dødsriterierne. David Bugge, som vi kender fra tidligere, vil med afsæt i Kirkegaardens begreb "sygdom til døden" reflektere over "fortvivlelse" og "håb" gennem en række litterære, filosofiske og teologiske punktnedslag.

17.15 - 17.35	A holistic approach to living and dying with severe COPD <i>v/Dr Rosalind Ann Taylor MBE Senior Palliative Physician Medical Director Michael Sobell Hospice, previously Royal Brompton Hospital London</i>
17.35 - 17.45	Online- discussion
17.45 - 18.15	Etiske og juridiske problemstillinger i relation til organdonation i Danmark efter ændringer i dødsriterierne <i>v/Helle Haubro Andersen/Christina Rosenlund, Dansk Center for organdonation</i>
18.15 - 18.45	Overvejelser og betragtninger omkring døden som baggrund for læge-patient relationen <i>v/David Bugge, lektor, PhD, Institut for kultur og samfund, Århus Universitet</i>
18.45 - 19.00	Online- discussion
19.00 - 19.10	Closing remarks

LUNG DISEASE FORUM
